

The conferencing case:

Due to the pandemic, the usage of technology, for video calls, has increased by 2900%, therefore, we think it's important to improve the overall quality of your webinars.

Many people rely on laptops for their everyday meetings, however these come with many disadvantages, for example their bad camera quality, the amount of space they take up, the time it takes to get the right lighting, bad sound quality and the danger of laptops overheating.

By purchasing this phone case you can maximise the quality of your calls. With an exclusive camera that rotates 360 degrees, an amplifying speaker, perfect lighting to ensure you look presentable and a stable stand (tripod) to balance and secure your phone, how can you resist this offer?

Our case is available in the following colours; black, silver and gold. In addition to our opening, we have limited pastel colours available in stores near you. Various sizes available for both apple and galaxy/ Samsung (from iPhone 6 and Samsung galaxy S8 above)

### Special features of this case:

- Built in halo lighting- 3 modes. (cool, natural warm lighting modes)
- Amplified sound with no added electrics
- A retractable wide-angle camera, connected to your phone via Bluetooth app
- A retractable, compact stand with 360-degree angling.

### Colours and materials:

- The stand will be made up of an alloy of aluminium and carbon fibre to ensure sturdiness
- The case, on which everything will be added, is made from polycarbonate due to it's lightweight and high impact resistance.
- The colour you choose will also determine the colour of the stand.

### Retractable Camera:

- The 9-megapixel camera will pop up from the case upon the press of a button on the top edge of the case
- 9 megapixels is the quality of the pictures
- Fisheye lens, no distortion
- Rotatable 360 degrees

### Stand:

- The stand will have a compact design.
- It will be attached to a 360-rotating platform with a thickness of 1.25 cm
- The stand will have retractable telescopic design and reaches a total length of 70 cm

## Lighting:

- The perimeter of the case will be lined with LED lights
- Your LED lights have three modes, cool-white, warm-white and neutral white
- The modes may be changed by pressing the on/off button once
- To turn the lights completely off, hold the on/off button for 5 seconds
- The lights do need to be charged
- They can be charged using the USB C charging port located on the back off the case on the bottom edge
