

## RECYCLING CLUB – ‘ECO FRIENDS’

We have planned the launch of our recycling club, where we will be doing several activities to promote recycling and to do our part in helping make our world become an eco-friendlier place. For example, for a period of 3, 30-minute sessions we will be making a small town completely made from recycled materials. In addition to that, we will be making some household items and doing lots of planting and gardening.

All our craft activities will be things that help the earth and are useful to people. Like the gardening they are purpose is to help with pollution. We also have many other fun activities planned, and the recyclable craft supplies left over from the activities we will keep and use for a bigger project. The main idea for these activities is to encourage recycling to be a day-to-day habit. This is not just for show we mean every word we have written. after we open our club nothing will change, we will do everything we have written. We really believe we can make a change and do the right thing.

Thank you for taking the time to read this – Samia and Radiyah.
